

OUR IMPACT 2026

BIOREST

BIOCULTURAL RESTORATION

COMMITMENT TO THE AMAZON

Transforming the privilege of sailing these waters into measurable restoration for the forest, and for the people who keep its memory.

WHO WE ARE

PIONEERS OF THE PERUVIAN AMAZON

Family-owned since 2006, and the world's first Relais & Châteaux river cruise —
defining luxury by connection, purpose, and responsibility.

OUR VISION

THE BENCHMARK FOR REGENERATIVE TRAVEL

Transforming operational excellence into measurable restoration for biodiversity and prosperity for our communities.

OUR COMMITMENTS

| Relais & Châteaux × UNESCO Alliance on Sustainable Hospitality

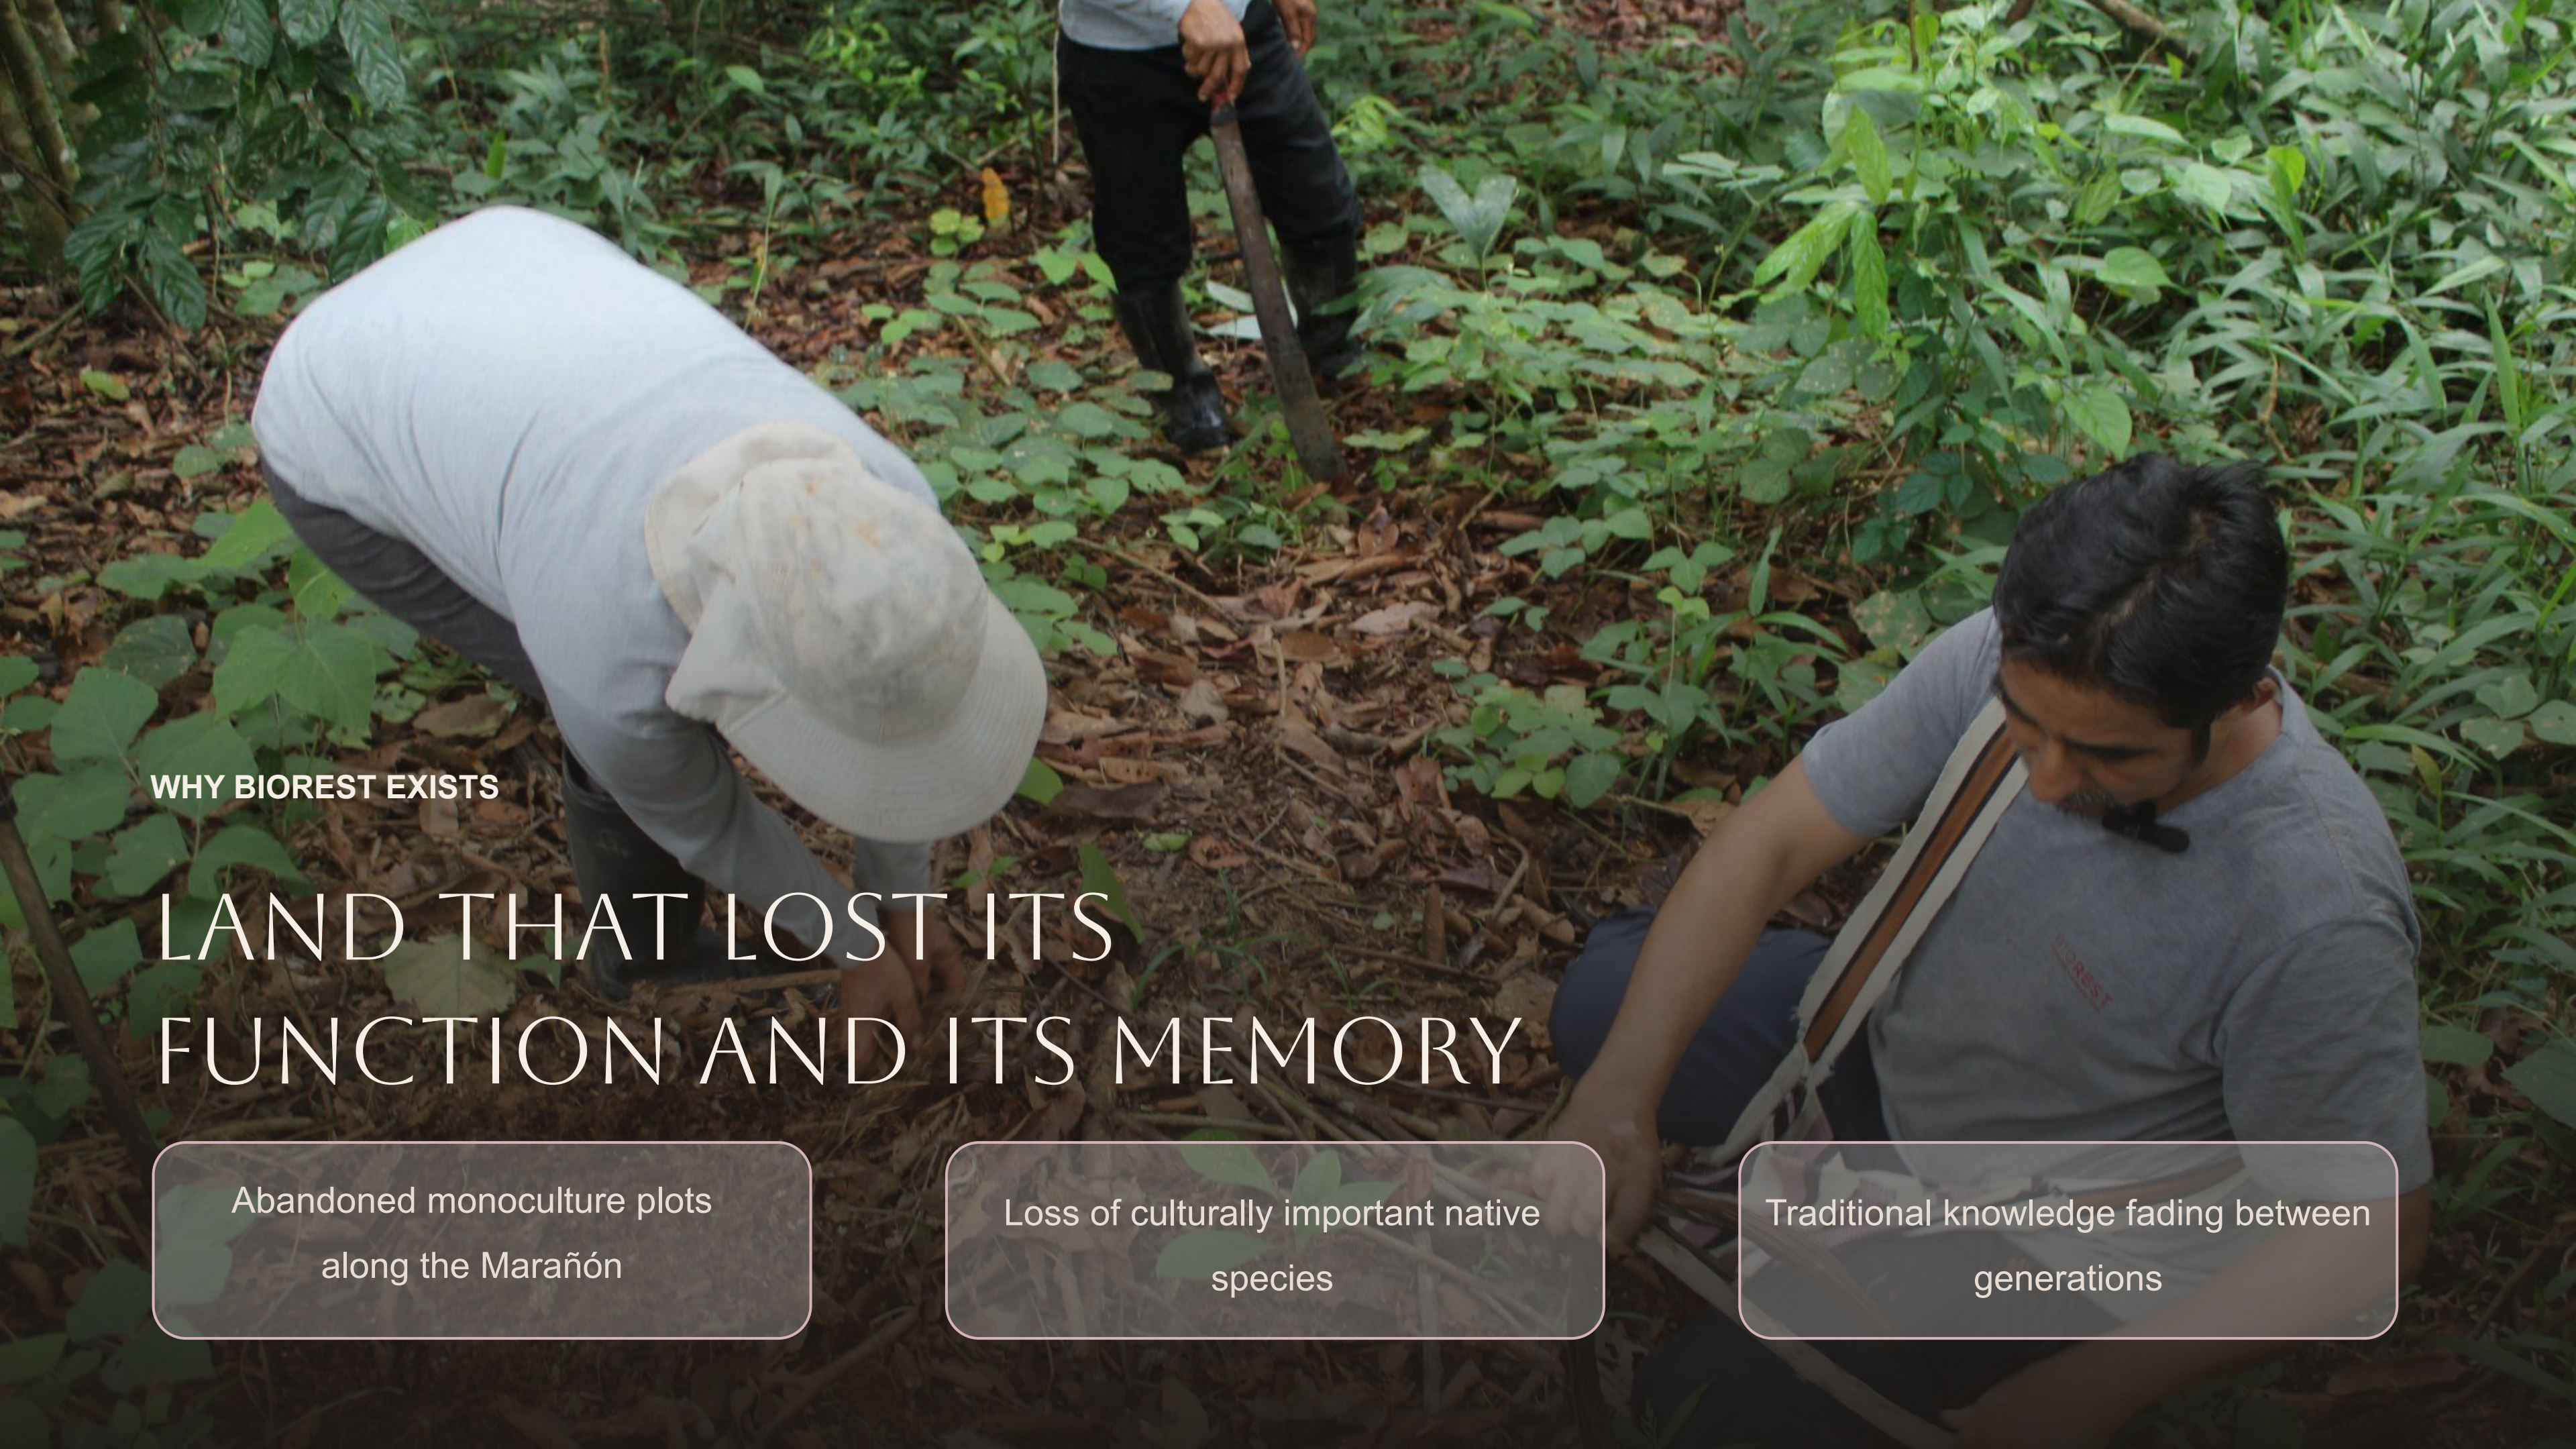

|| UN Glasgow Declaration for Climate Action in Tourism

||| United Nations Sustainable Development Goals

A philosophy woven into every aspect of our operations.

THE LAND REMEMBERS

The background image shows a lush, green forest floor covered in fallen leaves and small plants. A person wearing a white long-sleeved shirt, dark pants, and a light-colored cap is bent over, working on the ground. Another person, wearing dark pants and boots, stands in the background holding a long-handled tool. The overall scene is a dense, natural environment.

WHY BIOREST EXISTS

LAND THAT LOST ITS FUNCTION AND ITS MEMORY

Abandoned monoculture plots
along the Marañón

Loss of culturally important native
species

Traditional knowledge fading between
generations

THE PROGRAM

A CORRIDOR BUILT WITH THE COMMUNITIES

A voluntary restoration corridor created with three riverside communities of the Marañón, inside the Pacaya Samiria National Reserve where ancestral knowledge meets sound science.

OUR IMPACT PROGRAMS

BIOREST

The focal program corridor, field schools, fellowships, seed banking

CARBON FOOTPRINT

Measuring our path toward carbon neutrality

RIVER DOLPHINS

Citizen-science population monitoring with ProDelphinus

KEY SPECIES

Pacaya Samiria flagship species monitoring late 2026

BIOREST IN NUMBERS

425

acres of biocultural restoration corridor

1,680

native useful plants in the ground 17 species, 5 categories of use

ARTISANAL · CONSERVATION · FOOD · MEDICINAL · BIOCOMMERCE

18

families across three riverside communities

THE PATH

2006

Delfín is founded in Iquitos hospitality in service of the forest.

2024

Impact assessment under the Relais & Châteaux × UNESCO alliance.

2025

BioRest is born the corridor takes shape with three communities.

2026 +

The regional model for community-led biocultural restoration.

ROOTS IN KNOWLEDGE

THE ART OF MEMORY

PAINTED SO IT IS NOT FORGOTTEN

Each species returning to the corridor is
recorded in ink by Amazonian artist Luis
Pacaya botanical heritage rescued from the
brink of being forgotten.

VANILLA · INK ON CANVAS · 2026

LEARNING IN THE FOREST

FIELD SCHOOLS

Horticulture and wild-species conservation taught through restoration itself including seed banking, so knowledge and seeds remain in the communities.

SCIENCE IN THE CORRIDOR

RESEARCH FELLOWSHIPS

UNAP thesis research lives inside the corridor beginning with the restoration of neotropical butterfly habitat.

THE PEOPLE

EXPERTISE WITH INTEGRITY

OUR NATURALIST GUIDES

Expert bridges between our guests and the living forest every guide certified in safeguarding by Save the Children International.

WITH THE COMMUNITIES

CAPACITY STRENGTHENING

Training designed to remain in the communities long after each voyage now underway: avitourism.

A high-speed photograph of a river dolphin leaping from the water. The dolphin's body is arched, and it has just broken the surface, leaving a large, turbulent splash of white water and foam behind it. The water around the splash is dark and rippled. The dolphin's skin appears wet and glistening. The background is a vast expanse of water with subtle ripples.

CITIZEN SCIENCE

GUESTS BECOME RESEARCHERS

Nearly a decade of river dolphin monitoring with ProDelphinus and three sailings a year
hosted by marine biologist Dr. Joanna Alfaro.

WITH THE COMMUNITIES

PROSPERITY THAT STAYS

NATIVE BEES

Community millionarios for pollination and medicinal honey

WOMEN'S ENTERPRISE

Strengthening craft and commerce within the communities

LOCAL CAPACITY

Prioritizing local employment, services, and training

LOOKING AHEAD

THE CORRIDOR KEEPS GROWING

2026

Toward 3,000 native plants; field schools deepen in all three communities

2027

Guests walk the corridor with the people restoring it
